

Instant full protection against viruses and all risks on the Internet - now with CloseGap

G Data InternetSecurity 2014 uses the brand-new CloseGap technology to provide the best possible instant protection against viruses, hacking, spam, and all Internet threats.

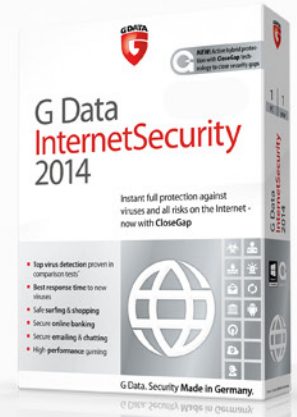

The active hybrid protection also covers regional threats; the firewall works quietly in the background and does not slow you down when gaming. Parental controls protect your children from inappropriate websites.

AntiVirus Firewall AntiSpam BankGuard AutostartManager AntiPhishing Parental controls Gaming Hotline

- **NEU:** Active hybrid protection with CloseGap technology to close security gaps (www.closegap.net)
- **NEU:** AutostartManager accelerates startup - boot up as you did on the first day
- **NEU:** Completely re-engineered user interface for intuitive use - no manual needed
- **IMPROVED:** New BankGuard technology for secure banking and shopping
- **IMPROVED:** Behavior monitoring even protects against unknown viruses
- **Integrated spam protection** protects against web-based attacks and infected email
- Additional **real-time data comparison** in the cloud protects against false positives
- **Recommended by gamers:** Top protection with **high-performance firewall** - no tedious pop-ups
- **Saves resources** thanks to fingerprinting, idle scanning, and active hybrid protection
- **Service Center:** We are here for you

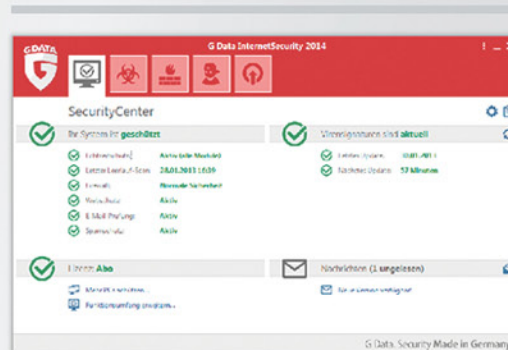

- Protect your **Android™** smartphone or tablet against viruses and mobile threats as well

The **double engine** offers total protection, but double detection takes up a lot of resources.

With active hybrid protection, **CloseGap** seals the gap completely - up to 30% faster.

With a new, more intuitive user interface.

Includes one 12-month license for 1 PC with hourly virus signature updates, software updates, and version upgrades
